Ultimate Rack Power Flexibility

Combination Outlet C13/C19 to provide the highest level of rack power flexibility to accommodate all initial development needs and any future equipment adds, moves, or changes.

Vertiv Universal PDU & FSC

Facility Side Cable (FSC)

- Features a universal connector that mates with the Universal Input on a Vertiv Geist UPDU.
- Meets common worldwide AC power configurations.
- The FSC defines the power configuration of the UPDU.
- Swap out the FSC to increase or decrease the power capacity of the UPDU based on changing business needs.
- Sold separately to provide increased flexibility.

The UPDU and FSC redefine the Rack PDU by reducing the complexity of IT power infrastructure deployments.

- The universal design enables a single UPDU to be purchased, installed, and shipped to any location regardless of power requirements.
- The UPDU product line offers a range of options to meet every customer's unique business needs.
- The universal power input can mate to any geographically specific FSC simplifying management and enabling rapid deployments worldwide.
